Excerpt from Alaska and the Klondike Gold Fields: Containing a Full Account of the Discovered of Gold; Enormous Deposits of the Precious Metal; Routes Traversed by Miners; How to Find Gold; Camp Life at Klondike. Klondike is the magic word that is thrilling the whole country. It stands for millions of gold and great fortunes for hundreds of miners, who have risen from poverty to affluence in the brief period of a few months. Thousands are reading of fortunes made in the Klondike Gold Fields, and thousands of others are turning their longing eyes toward the new El Dorado. The old Spanish dreams of a wonderful realm somewhere in the Western Continent, made of gold and precious stones, seem almost on the point of being realized. Not since 1849, when the marvellous discoveries of gold were made in California, has there been such excitement among all classes of people. Everybody wants to know the real facts concerning the new discoveries. On every hand there is an eagerness for the most reliable information, which is furnished by this new and comprehensive work, containing a full description of Alaska and the Gold Regions. The author writes from personal experience and observation, as he has been an eye-witness of the scenes, incidents and facts which he describes and narrates. The work gives a complete account of the rise of the gold fever, the excitement produced by the news of unlimited deposits of the precious metal; the rush of miners seeking fortunes at Klondike; hasty preparations for the long and perilous journey; and the formation of companies eager to take possession of the region abounding in untold wealth. The thousands of prospectors hurrying to the Gold Fields give us a picture of the rush to California when the discoveries of gold were made in that State in 1849.
