IS YOUR WASHER: Leaking water or oil? Overflowing? Not filling, or filling too slowly? Not agitating, or agitating weakly? Not spinning? Not draining? Not doing anything? Leaving your clothes too wet at the end of the cycle? Vibrating uncontrollably? Spinning and agitating at the same time? Screeching, squeaking, clattering, knocking, buzzing, or making grinding or other strange noises? Do you smell smoke? Our washer repair manual can help! Your Whirlpool washer is leaking; what things do you check first? The same things tend to fail in the same designs. Why not save yourself some time, hassle and money, and just go there first? Diagnosis and repair procedures are included for the most common symptoms, such as leaks, no fill or slow fill, clothes too wet after cycle ends, no agitate, no spin, no drain, timer, drive motor and other electrical troubles.
