

IEC 60933-5 Ed. 1.0 b:1992, Audio, video and audiovisual systems - Interconnections and matching values - Part 5: Y/C connector for video systems - ... values and description of the connector

Applies to the transfer of video signals between two pieces of equipment in an NTSC, PAL or SECAM high-resolution video system, in the form of a Y-signal, consisting of luminance + blanking + sync, and a C-signal, the same as the modulated chrominance signal of the composite video signal. It specifies the signal levels and impedances at the interface and the type of connector to be used. This title may contain less than 24 pages of technical content.
