Automotive EXAMINATION Workbook (Sensors) (Includes Sensor Diagrams and Over 200 Sample Certification EXAMS) By Mandy Concepcion This book Automotive EXAMINATION Workbook (Sensors) is meant to be used as an EXAM preparation for the ASE certification or any other training testing program. It is derived and part of the companion book series Automotive Sensor Testing. These two book volumes are complimentary to each other and go hand-in-hand. Although these questions do not follow the ASE format (mechanic A, B, etc), it is highly useful when preparing for any of the engine performance or electronics ASE exams. The workbook is divided into three sections pursuant to automotive sensor: First are direct sensor wiring diagram, used to answer the questions. The diagrams are followed by the applicable questions. Finally, there is a form that, if desired, can be filled out and sent to us for the issuance of a completion Diploma. NOTE: All question answers can be found at the end of the book. The workbook is meant to be used in conjunction with its complimentary Automotive Sensor Testing book. There is no theory or textual explanations in this workbook. Finally, there is also a DVD video that, although not necessary, is also a compliment to this workbook. Special thanks to Carmen Diaz for her invaluable input on the cover layout, structure, arrangement and proofing.
