

# Revolutions: Bandags 50 Years of Innovation in the Tire Industry

A Shirt-sleeve Saga: Revolutions is not a story of white-collar business strategy but of roll-up-your-sleeves, get-dirt-under-your-fingernails, no-sissies-allowed, blue-collar craftsmanship. Its about sweaty manufacturing shops, tire dealers willing to risk their life savings, and over-the-road truckers with their very lives riding on the quality of their tires. And its about managing operations growing in complexity every day, overcoming daunting challenges from machine tolerances to foreign currency collapse to fending off competitors 20 times their size. The story of Bandag is the saga of working men and women during 50 years when pride still mattered, when going to the job was like running onto the field for a big game, when at the end of the day the strong, road-sawy and dedicated people of Bandag could say to themselves and those with whom they shouldered the load, Ours was a job well done. The Lesson from Bandag: Perhaps the greatest lesson Bandag could teach the business world is the power of vision. From the beginning, the tire retreaders vision was bolder than innovative new products and profit margins. It was about changing the transportation industry. That vision was crystal in the mind of Roy J. Carver, the companys founder 50 years ago, and he drove hard to make it reality. But his success ultimately hinged on his ability to create a shared vision among his colleagues and then to lock that vision into the corporate culture so that executives, employees yet unhired - and especially the network of rambunctious tire dealers - would all live in it. One of Carvers old-time colleagues relates how Carvers co-workers became radically dedicated to making the vision a reality. We were involved in a new venture - which was an adventure - and when the vision was put in front of people, they wanted to be part of it.

How did Carver and company accomplish that? You'll know after reading this book.
