

## Correlated Courses in Woodwork and Mechanical Drawing

This book contains a series of correlated courses in woodworking and mechanical drawing. It focuses on practice, teaching and manual training, rather than upon theory. It is the result of carefully prepared plans, executed under public school conditions by the author himself, covering a period of some nine years of examination. Tackling all aspects of woodworking and being aimed at students, this text is perfect for those with little experience and also makes a great reference book for those who are more familiar with the subject. The chapters of this book are: Classification and Arrangement of Tool Operations, for grades 7, 8, 9, 10; Classification and arrangement of Elements of Mechanical Drawing, for grades 7, 8, 9; Shop Organization; Equipment; and Working Drawings. We are proud to republish this antique book now complete with a new introduction on woodworking.
