

Current Themes in Engineering Science - 2010:: World Congress on Engineering - 2010 (AIP Conference Proceedings)

This proceedings would be of interest to research practitioners in academic and industrial sectors and government laboratories. World Congress on Engineering covers engineering science and research understood in broadest terms, as the set of methodological approaches to developing and supplying technology solutions for humanity's needs. Multi-disciplinary engineering studies presented here cover the areas of activity ranging from design and testing of industrial components and transport assemblies to statistical analysis and biomedical research.
