

Easter Island and Other Poems

Easter Island and Other Poems is an anthology of poems covering the materialistic as well as the supernatural and mystic aspects. Some of the poems are stories which the author has attempted to transform into verse. The themes center around the rapid changes that are taking place in the world nowadays and the authors reflections and comparisons regarding the same, mostly ending with a philosophical outlook. Since this is the case, needless to say, a majority of the poems are introspective in nature. Since poems themselves form a concentration of thoughts.
