

# Festive Drama: Papers from the Sixth Triennial Colloquium of the International Society for the Study of Medieval Theatre, Lancaster, 13-19 July, 1989

Festive drama, in these studies, includes processions and folk-customs as well as full-blown plays, from Spain, the Netherlands, France, Germany, Britain, Denmark, and Bohemia (now the Czech Republic). The main focus is the middle ages, but style and approach are as relevant as time-scale, reflecting a culture in which there are no firm divisions between drama and pageantry and traditional ceremonies. Common themes emerge: the world turned upside-down of Shrovetide; the emotive power of religious celebration; and the links between commerce and the demonstration of civic pride. Festive customs are viewed as hidden agendas of popular culture, and performances are reconstructed. This is the obverse of art and power: the means by which the people, not the princes, rule the world. Professor MEG TWYCROSS teaches at the Department of English at Lancaster University.
