

ISO 16121-1:2005, Road vehicles - Ergonomic requirements for the drivers workplace in line-service buses - Part 1: General description

ISO 16121-1:2005 applies to the drivers workplace in low-floor line-service buses designed for the carriage of passengers, comprising more than eight seats in addition to the drivers seat, and having a maximum weight exceeding five metric tonnes and an overall width exceeding 2,30 m. It contains basic requirements for an ergonomic and comfortable seating position, which is essential to keep drivers in a good state of health. The dimensions and mounting positions of drivers seat, pedals and steering have to be carefully chosen, to enable drivers to sit in an ergonomic seating position, i.e. sitting at angles which comply with the given ranges of comfort and to allow some variation when seated. This title may contain less than 24 pages of technical content.
