

MTConnect To Measure Is To Know

MTConnect will be more important in the 21st century for manufacturing than CNC was for manufacturing in the 20th century.

John Byrd
Former President of AMT The Association For Manufacturing Technology
I am very glad to see that MTConnect continues to thrive and has become a true game changer for manufacturing. I enjoyed working with Dave on MTConnect and believe this book, MTConnect: To Measure Is To Know, is a great way to learn not only about MTConnect, but also to understand the important principles and lessons learned from open systems that Dave shares with the reader.

Dave Patterson
David A. Patterson joined the faculty of the University of California, Berkeley, in 1977. He is holder of the E.H. and M.E. Pardee Chair of Computer Science and is a member of the National Academy of Engineering and the National Academy of Sciences. Sun Microsystems forever changed the world of computing in many significant ways. Daves book, MTConnect: To Measure Is To Know, is a great way to not only learn about this game changing technology called MTConnect, but to understand how the open system principles, that we believed so strongly in at Sun Microsystems, can be applied to manufacturing.

Scott McNealy
Co-Founder, President and Chairman of the Board for Sun Microsystems
