

Automotive Air Conditioning 2nd Edition(Chinese Edition)

Paperback. Pub Date: 2010 Pages: 165
Language: Chinese in Publisher:
Machinery Industry Press the textbook is a comprehensive and systematic introduction to the basics of automotive air conditioning; structure and working principle of the main components in the automotive air conditioning; automotive air conditioning and refrigeration systems temperature control; automotive air conditioning and ventilation. heating and gas distribution systems; works and analytical methods of the control circuit. as well as the basic components of the various types of microcomputer control system. structural characteristics and working principle. This material also for the vocational automotive electronics specialty training direction. devoted much describes the overhaul of automotive air conditioning systems. maintenance and technical specifications. the textbook has some practical value. e...
