

# Norriss Hand-Book for Locomotive Engineers and Machinists: Comprising the Proportions and Calculations for Constructing Locomotives, Manner of ... Squares, Cubes, Areas, &C (Classic Reprint)

In presenting this work to the Engineers of the United States I beg they will study it with attention, as it is the result of many days close application and research. I have taken care to present all formulas and rules in the most simple manner, so that there will be no danger of the young student being discouraged by unnecessary display of algebraical formulas, which the sight of frightens the timid. All may understand who are familiar with the simple rules of Arithmetic, Addition, Subtraction, Multiplication, and Division. (Typographical errors above are due to OCR software and do not occur in the book.) About the Publisher Forgotten Books is a publisher of historical writings, such as: Philosophy, Classics, Science, Religion, History, Folklore and Mythology. Forgotten Books Classic Reprint Series utilizes the latest technology to regenerate facsimiles of historically important writings. Careful attention has been made to accurately preserve the original format of each page whilst digitally enhancing the aged text.
