CAUFOHNTA PREFACE TO THE
SWEDISH EDITION. A DESIEE has for
some time been expressed in various
quarters for aH and-B ook of Slojd, written
from the educational point of view. There
have been many indications, especially in
connection withS lojd carpentry, that
teachers are not well enough acquainted
with the tools employed to select and
manage them properly; and a degree of
uncertainty seems to prevail regarding the
right method of executing the exercises.
Now, it is true that no one can acquire this
knowledge from books ;the way to acquire
it is by practical, personal experience. Yet,
to retain this experience, and apply it, is
partially a matter of memory, and,
therefore, systematically arranged
directions are capable of rendering aid
which is not to be despised. A hand-book
like the present does not, and could not,
supersede personal experience at the bench,
or render a course of instruction
unnecessary. I ts sole object is to
supplement and complete the notes which
every conscientious student takes during
such a course. I ts aim is, therefore, chiefly
to strengthen and confirm knowledge
already acquired; but, though it is thus
limited in scope, and, on this account,
perhaps to be regarded as in some respects
incomplete, the writers venture to express
the hope that it will be welcomed by many
teachers. Books are, perhaps, more
frequently published before their time than
after it; and although there have been
numerous opportunities for observation in
the province of Educational Slojd during
the last eighteen years (the Slojd Institution
at Naas having begun operations in 1872),
the writers are nevertheless uncertain
whether the time has really yet come for
the publication of definite directions; or, at
least, whether their knowledge of the
subject is yet complete enough to justify

their appearance in print (Typographical errors above are due to OCR software and do not occur in the book.)
