

The Greener Homes Price Guide

With increasing concerns over global warming and rising fuel costs there is a growing emphasis on the need to undertake work to domestic property in order to save money, and at the same time help the environment. The Greener Homes Price Guide contains costings and budgeting information that will assist you in achieving these aims. From the initial cost of installing or modifying an existing device, to maintenance costs including savings and the payback period; this guide will help you if you want to improve the energy efficiency of your home by saving on wastage; and install new equipment to reduce running costs. There are lots of books available telling you what to do to improve your property to make it more environmentally friendly. What they don't usually tell you is what it will really cost and this guide does. The guide gives you the cost information that will enable you to budget for improving the energy efficiency of your home and reducing your carbon footprint. It walks you through how to obtain builders or specialist contractors to actually do the work. It provides an indication of savings in running costs. It also provides an idea of payback periods. It enables you to assess your carbon footprint.
