

Civil Building Heating, Ventilation and Air Conditioning Design Specification Coaching Material (Chinese Edition)

Targeting main contents of specifications, the book makes systematic introduction from interior air design parameters, outdoor design computation parameter, heating, ventilation, air conditioning, testing and monitoring, noise elimination and vibration isolation, thermal insulation and corrosion prevention. At the same time, the book also systematically introduces accurate connotations of mandatory clauses, basic and common problems in heating, ventilation and air conditioning design, and building energy-saving related specification coordination and connection, for engineering technical personnel to use and refer to.
