

## Pumps and Pumping Machinery, Vol. 2 (Classic Reprint)

Excerpt from Pumps and Pumping Machinery, Vol. 2 In making the additions contained in Part II. of this book, I have added a description of Hand Power Pumps, as suggested by some of my friends, and have selected some important modern types of pumping machinery, many of which, by courtesy of the manufacturers, I have been able to illustrate in the Drawings, Nos. 24 to 31. I have also been able to add further details and data of some of the machinery described in the First Part. I have to tender my sincere thanks to the firms named hereafter for the assistance they have kindly afforded me. Many extra examples might have been given of some of the types now described; it was however considered desirable not to repeat matter when the general principles of working were much the same. I trust the present book will meet with the same kind reception as the last. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
