

## Transmissions & Transaxles Video Series - (Tapes 1-4, Automatic Bundle)

Ideal for use independently, or as a supplement to any automotive technology book, this two-part series contains 160 minutes of live action video and professional-quality animations. As they watch each tape, viewers are guided step-by-step to a complete understanding of basic transmissions and transaxles principles and repair procedures. Automatic transmissions is the focus of the first set of four tapes which features an introduction to drivetrain theory, hydraulic torque multipliers, common automatic transmissions, and hydraulic systems. The second set of tapes shifts the viewers attention to manual transmissions and transaxles, drive shafts, universals, and four-wheel drive systems. In all tapes, actual automotive technicians, authentic automotive repair shops, and late-model vehicles are used to ensure that information is presented as realistically as possible.
