

Chemical unit processes and operations(Chinese Edition)

Paperback. Pub Date :2014-01-01 Pages: 251 Language: Chinese Publisher: China Textile Press book is vocational education five ministerial-level planning materials. teaching choreography to process chemical unit operation as a carrier. three Biography theory as the main line. is divided into four teaching modules: fluid transport technology. heat transfer technique. separation technology and other unit operations techniques. Separation techniques include the Department of heterogeneous material separation technology absorption technique. distillation technique. drying technique; other unit operations is mainly the introduction of membrane separation technology and refrigeration unit operations and other new technologies. Each module compiled with reading information to expand their knowledge. before the proposed learning module requires a clear knowledge of the target to be m...
