

Turning Projects: with Richard Raffan (Fine Woodworking DVD Workshop)

In this tape, you'll learn to select the wood species best suited for a wide variety of turning projects. Raffan shows you how to manipulate skewers, gouges and parting tools to produce the whole repertoire of wood-turning cuts, and how to recognize the structural aspects of a project as it develops on the lathe. Raffan also shows you how to sand and apply finishes and waxes, and he offers important safety tips throughout the tape.
