

Welding engineer Volume 6

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1921 Excerpt: ...and in the case of non-members, a slightly greater amount will be charged to cover the necessary overhead expenses. The price of technical bulletin No. 1 is 25c to members and 50c to non-members. Orders for the same may be addressed to the Secretary of the Society. Remittances of less than \$1.00 may be made with stamps. prepared to meet the demand for a high carbon electric welding wire for the building up of worn surfaces where great resistance to abrasive wear is desired. A special bulletin will be issued on coated materials, including the analysis of coated electrodes found to be successful for various welding purposes. A second bulletin will include wire for gas welding of high carbon, nickel steel, brass, bronze and aluminum. These bulletins will be issued to serve as a preliminary guide until definite recommendations may be offered. SPECIFICATIONS FOR STEEL TO BE WELDED Recognizing that the quality and composition of the base metal has an important bearing on the quality of the resulting weld, the bureau created a committee to deal with the specifications for steel to be welded. This committee, of which Mr. W. J. Beck is chairman, is co-operating with the American Society for Testing Materials and will make use of any existing specifications wherever such specifications will be found suitable for welding purposes and modifying them only when necessary. WELDING WIRE SPECIFICATIONS Specifications for welding wire, gas and electric, have been prepared by the Welding Wire Specifications Committee for the welding of mild steel. They will be published shortly and thus made available for distribution. Specifications have also been
